

Shown: CAP 18W9R 90 Degree Right Hand Turn Pass Thru

CAP 18W9

Pass Thru Air Lock Cleanroom Entry System

The CAP18W9 Wall Mounted 90 Degree Pass Thru airlock cleanroom entry system is designed for those cleanrooms where space limits require a 90 Degree turn in the PassThru. As with all CAP Pass Thrus, the CAP18W9 is built with an innovative double wall design, stainless steel integrity, and solid construction. The CAP18W9 is built with formed and stitch-welded stainless steel. Doors are connected with stainless steel continuous flush-mounted hinges, and feature generously sized clear Tempered Safety Glass viewing windows.

Doors are secured with heavy duty over center stainless steel compression latches that tightly seal against closed-cell PVC foam door gaskets. An optional interlock prevents depressurization from both doors from being opened at the same time.

The double-wall design of the CAP18W9 features smooth, durable surfaces that are easy to clean. Mechanical parts are concealed and protected by service panels that are easy to remove for maintenance and cleaning. The superior engineering of the CAP18W9 design and stainless steel construction means maximum value, flexibility and ease of use. It can be mounted flush or center mounted for efficiency with stainless steel mounting frames. The CAP18W9 Pass Through maximizes the efficient use of space in cleanrooms, and its elegant look upgrades the appearance of any cleanroom. Specify CAP18W9R for the Right Hand Turn, or Cap18W9L for the Left Hand Turn.
